

## High Performance Joinery Coatings

Timber is enjoying a resurgence in popularity helped by the durability of modern high performance wood finishes and coating systems. The Sikkens range from Akzo Nobel, offers a wide choice of specialist joinery products for factory finishing and has always been synonymous with quality and craftsmanship. By continuous international research, Akzo Nobel is able to develop coatings at the leading edge of technology, making it the market leader in the European coatings industry.

***“ The Sikkens brand offers highly advanced and durable coatings for the production of factory finished joinery ”***

The Sikkens range of water-borne wood finishes offer the following benefits

- Long term durability and flexibility of the water-borne coatings
- Protects the timber from moisture ingress & the damaging effects of UV light
- Moisture vapour permeable properties allow the timber to exchange moisture in a gradual way in relation to the surroundings
- Extensive range of colours available (including BS4800 & RAL)
- Greatly reduced environmental impact compared to solvent-borne coatings
- Coatings are applied in a controlled factory environment
- Full range of on-site maintenance coatings available

*In addition these facts are supported by independent tests, (e.g. BRE & TRADA), detailed information can be provided upon request*
